

EchoStar Signs Long-Term SATCOM Contract with ARTEL, Inc.

ENGLEWOOD, Colo.--EchoStar Fixed Satellite Services Corporation (EFSSC), a subsidiary of EchoStar Communications Corporation (NASDAQ: DISH), announced today that it has entered into a long-term contract with ARTEL, Inc. to provide fixed satellite service for the Department of Defense (DOD). Through the agreement, EchoStar will provide ARTEL multiple satellite transponders within its satellite fleet.

"We are pleased to enter into this agreement with ARTEL to provide them with critical bandwidth and uplink services within our fixed satellite service product," said Michael Kelly, executive vice president of FSS Business Development for EchoStar. "With EchoStar's fleet of 14 satellites, we were able to establish a satellite solution to achieve the unique requirements presented by ARTEL and the Department of Defense."

EFSSC's capacity will be used by the U.S. Military in conjunction with the Joint Network Node (JNN) mobile communications system. The JNN allows the U.S. Military to route communication and data, as well as Voice over Internet Protocol (VoIP) traffic, over commercial satellites to connect with other military networks. EchoStar represents a significant source of Ku-band and Ka-band satellite capacity together with satellite related products and support services.

"We look forward to working with EchoStar and feel that there are many synergies between our companies," noted Abbas Yazdani, president and CEO of ARTEL. "This type of business requires customized solutions and EchoStar's uplink engineering staff has been very responsive to our requests."

For more information on EFSSC or for occasional satellite services, contact Michael Kelly at 303-723-1080, michael.kelly@echostar.com or Greg Sheldon at 303-706-5264, greg.sheldon@echostar.com.

About EchoStar Fixed Satellite Services Corporation (EFSSC)

EFSSC owns or leases 14 in-orbit satellites operating in FSS Ku-band, BSS and Ka-band. The company has an extensive terrestrial fiber optic network with points of presence in 168 cities and seven regional gateways to provide customers with end-to-end connectivity and a reliable platform to distribute

video and data throughout the United States and internationally.
