

Massey Ferguson's flagship MF 9S has scooped two awards at the Techagro show in Brno, Czech Republic: The Zemědělec (Farmer) Award and the GRAND PRIX 2024.

As part of the Brno Agricultural and Forestry Fairs, editors from specialist magazine publisher Profi Press s.r.o. presented the MF 9S with 'The Zemědělec' (Farmer) Award to representatives from Austro Diesel GmbH, our Austrian distributor.

The editors praised the MF 9S.425's Dyna-VT stepless transmission and its Automatic Mode, which manages the engine according to load. As well as the powerful hydraulic system, they also highlighted the unique Protect-U design, with its unique 18cm gap between the engine and cab reducing noise levels and vibrations. One of the largest on the market, the cab offers excellent comfort and visibility along with easy to use, ergonomically positioned controls.

The tractor has also won one of the GRAND PRIX TECHAGRO 2024, awarded by the show organisers to honour exceptional innovations and achievements.

Radim Vlcko from Austro Diesel Czech Republic with the two awards in front of the MF 9S.
