

Virginia American Water Announces Upcoming Annual Spring Hydrant Flushing in Hopewell and Fort Gregg-Adams Districts

Hopewell, Va. (April 12, 2024) – Virginia American Water will begin routine flushing of its water distribution system in the City of Hopewell, as well as the subdivisions of New Birchett Estates, Cedar Creek, Cedar Creek West, Strattford Woods and Mullberry Woods in Prince George County and Fort Gregg-Adams, beginning Monday, April 22 and is anticipated to complete flushing by the end of June. Virginia American Water's Hopewell Water Treatment Plant will begin the routine, temporary change in water treatment from combined chlorine to free chlorine on April 15.

During the routine change in disinfectants, some residents may notice a slightly stronger chlorine taste and odor in their drinking water. If you're especially sensitive to the taste and odor of chlorine, we recommend that you keep an open container of drinking water in your refrigerator. This will enable the chlorine to dissipate, reducing the chlorine taste.

This work is an essential part of our system maintenance program and is necessary for customers to continue to receive high-quality water service. Flushing the system helps to clean out any buildup of mineral deposits and sediment inside the pipes. The company also flushes its hydrants to confirm they are operational and to check fire flows in the system. The process of flushing involves simultaneously opening fire hydrants in a specific area to create increased water flows.

Tips for Customers During Hydrant Flushing

If customers experience temporary water discoloration, Virginia American Water recommends running the cold water until it is clear. The following steps are also encouraged:

- Store a large bottle of water in the refrigerator for drinking.
- Check for discolored water before using the washing machine or dishwasher.
- If water pressure or water volume seems low after flushing has been completed, check faucet screens for trapped particles.
- Watch for flushing crews -Please use caution when driving through an area where crews are working.
