

West Virginia American Water Celebrates Mid-Year Milestone with Significant Investment in Infrastructure Projects

Charleston, W.Va., (Aug. 6, 2024) – West Virginia American Water announced today a major milestone in its ongoing commitment to addressing the state’s aging infrastructure needs. As of mid-2024, West Virginia American Water has invested approximately \$13.2 million, an investment unmatched by any other water utility in the state, to replace over 40,575 feet of water main. The 34 projects completed or in-progress to date are aimed at helping to improve service reliability for customers.

This significant and continual investment underscores the company’s dedication to providing safe, reliable service and fostering economic growth in communities across the state. Key water main replacement projects for 2024 include:

- Goad Road in Clendenin: 1,150 feet for a total investment of \$470,000
- Birch Road in Charleston: 500 feet for a total investment of \$278,000
- 2nd Avenue in Oak Hill: 25 service tie-overs for a total investment of \$172,000

These infrastructure upgrade projects are not only an important investment in public health and safety, but they also help support the economic health of the communities served by West Virginia American Water. Economic impact studies show that for every \$1 million invested in water infrastructure, upwards of 15 jobs are generated throughout local economies.

Over the past decade, West Virginia American Water has invested over \$736 million, in infrastructure projects and capital upgrades to address aging infrastructure across the Mountain State, including more than 168 miles of new water main. To learn more about our ongoing investment in infrastructure, [visit the company's interactive upgrade map](#).

During construction, customers may experience temporary service interruptions, discolored water, and/or lower than normal water pressure. Crews will work as quickly as possible to shorten the length of these temporary inconveniences. To report water related emergencies such as leaks, main breaks or other service disruptions, [customers can submit a service request on the company's website](#).
