

New Jersey American Water Issues Mandatory Boil Water Advisory for Greenbrook Township and Warren

Customers in these towns are instructed to boil their water before using

CAMDEN, N.J. – November 4, 2024 – As a result of loss of pressure from a 12-inch water main break on King George Road in Greenbrook Township, New Jersey American Water has issued a mandatory boil water advisory for customers residing in Greenbrook Township and Warren. (Raritan System PWSID: NJ2004002)

A potential or actual threat to the quality of water being provided to the above area currently exists. As a precaution, we are implementing a limited Boil Water Advisory until testing of the water supply is deemed satisfactory. New Jersey American Water will provide information as to when the advisory is lifted.

Effective immediately and until further notice, customers within the impacted areas are instructed to bring tap water to a rolling boil for one minute and allow cooling before using, or use bottled water. Boiled or bottled water should be used for drinking; preparing foods; mixing baby formula, food, juices or drinks; washing vegetables and fruit; cooking; making ice; brushing teeth; and washing dishes until further notice. Boiling kills bacteria and other organisms in the water.

New Jersey American Water also recommends the following steps:

- Throw away uncooked food or beverages or ice cubes if made with tap water during the day of the advisory.
- Keep boiled water in the refrigerator for drinking.
- Do not swallow water while showering or bathing.
- Do not use home filtering devices in place of boiling or using bottled water, most home water filters will not provide adequate protection from microorganisms.
- Use only water that has been boiled (and cooled) to treat minor injuries.
- Rinse hand-washed dishes with a diluted bleach solution (one tablespoon of household bleach per gallon of tap water) or clean your dishes in a dishwasher using the hot wash cycle and dry cycle.
- Upon boiling water for potable use, it is suggested that 2-3 gallons of boiled (and cooled) water be stored in the refrigerator in one gallon-containers for use in cooking, drinking, etc. Water can be stored in this manner for 2-3 days.
- Pets should be provided with drinking water that has been boiled (and cooled) in the manner indicated above.

Please continue to boil your water or use bottled water until you are notified that the water quality is satisfactory. This advisory will remain in effect until repairs are completed and testing shows the water quality to be safe.

Impacted customers are being notified of this boil water advisory via the

company's emergency notification system. New Jersey American Water is working to resolve the issue as quickly and safely as possible. Updates as they occur will be made available on the website at www.newjerseyamwater.com, under [Alerts](#), and on the company's [X](#) and [Facebook](#) pages. If customers have any questions, they may call 1-800-272-1325.
