

California American Water Completes Acquisition of Mesa Del Sol Water System

PACIFIC GROVE, Ca. (May 21, 2025) – California American Water has acquired the Mesa Del Sol water system in the Corral de Tierra area of Salinas. The system was acquired following a project to physically interconnect the Mesa del Sol system with California American Water's Toro Park system to solve water quality challenges in Mesa Del Sol. The acquisition adds 15 new water connections to the company's current customer base, which already includes approximately 40,000 connections on the Monterey Peninsula and other parts of Monterey County.

"With our experience providing safe, reliable water service throughout the Monterey Peninsula, we were a natural fit to consolidate this small system and solve their water quality challenges," said Spencer Vartanian, Director of Operations for California American Water. "We are pleased to welcome these new customers and look forward to providing exceptional service moving forward."

With the acquisition of the Mesa Del Sol water system, the residents of Mesa Del Sol will benefit from the industry expertise and experience that California American Water offers. The new customers will now have access to a bilingual website and information, online billing and payment, conservation services and affordability programs.
