

Virginia American Water Files Rate Request Driven by More Than \$115 Million in Investment

Request reinforces company's commitment to providing safe, clean, reliable and affordable water and wastewater service

ALEXANDRIA, Va. (November 3, 2025) – Virginia American Water filed a request today with the Virginia State Corporation Commission (SCC) for new rates, reflecting more than \$115 million in water and wastewater system investments. The request reinforces the company's commitment to replacing aging infrastructure and continuing to provide safe, clean, reliable and affordable service in compliance with environmental regulations for the benefit of customers.

"Our commitment to long-term investments in our water and wastewater systems helps ensure we continue to deliver high-quality service across the Commonwealth," said Laura Runkle, President of Virginia American Water. "Our approach underscores our commitment to the health and safety of our customers and the communities we serve."

Among the investments included in the request are updates at water treatment plants, replacement of aging water pipelines, and upgrades to storage tanks, pumping stations, meters and more. The company's last general rate case was filed in November 2023.

In today's filing, Virginia American Water is seeking a total annual revenue increase of approximately \$21.9 million. If the company's proposed rates are approved as requested, the monthly water and wastewater bills for the average residential customer using 4,000 gallons per month would each increase by approximately \$11 per month.

The new rates proposed in today's filing are a request only. Interim rates, based on the company's proposed increase, are planned to take effect on or about May 1, 2026. Once a final decision has been made by the SCC, the difference between the interim and final approved rates is subject to a refund. Customers will be informed of the approved rates by mail and on the company's website.

Virginia American Water offers bill paying assistance programs that include payment plans, budget billing and, for income-eligible customers, the company's H2O Help to Others customer assistance program. More information can be found by clicking the [Customer Assistance Program](#) link under Customer Service & Billing on the company's website.

The SCC's rate review process offers multiple opportunities for customer involvement. Customers can participate through written comments, attendance at public input hearings, and consumer advocacy organizations that participate in the proceedings.
