

Kentucky American Water to Upgrade Water Infrastructure in Lisa Drive Area of Lexington with \$1.4 Million Investment

LEXINGTON, Ky., March 23, 2026 /PRNewswire/ -- Kentucky American Water is investing approximately \$1.4 million to upgrade critical water infrastructure in Lexington on Lisa Court, from the start of Lisa Court to the end of Lisa Drive, and Allen Drive, from Lisa Court to Judy Lane. This project will also include Faye Circle, Carla Court, Mona Court and Lisa Circle. The company is replacing approximately a half mile of aging water main to help ensure continued reliability, water quality and fire protection for customers. The project will replace 3,300 feet of 2-inch, 6-inch and 8-inch water main that was installed in the 1960s with new 6-inch and 8-inch ductile iron main.

This investment is part of the company's ongoing commitment to strengthen water infrastructure to support reliable service and consistent water quality over time. By making planned investments in infrastructure, Kentucky American Water helps reduce the likelihood of service interruptions, improves water flows for homes and businesses and supports dependable fire protection for the community. These improvements are designed to deliver long-term value by reinforcing the system customers rely on every day.

Construction will begin this month. Crews will typically work Monday through Friday from 8 a.m. to 6 p.m. Access to homes and businesses will be maintained throughout construction, and crews will work directly with customers to accommodate driveway access as needed.

In areas where excavation is required, temporary surface restoration will be provided. Permanent restoration will be completed once the soil has time to settle and weather permits.

Work will be performed by local, qualified contractor Lagco, Inc., with traffic control coordinated in partnership with local authorities. Motorists are advised to use caution near work zones, follow posted signage, and expect some construction-related noise during active work hours. Emergency vehicle and local access will be maintained at all times. Daily site cleanup will occur, and driveway, sidewalk, and landscaping restoration will be completed upon project conclusion.
