

Chattanooga State and Tennessee American Water Host Hamilton County Students in 2026 Elementary Science Olympiad

CHATTANOOGA, Tenn., May 5, 2026 /PRNewswire/ -- The Elementary Science Olympiad, an annual event focused on inspiring Hamilton County youth through hands-on STEM learning, was held yesterday and brought together hundreds of elementary students from across Hamilton County.

The Elementary Science Olympiad is presented through a partnership between Hamilton County Schools and Chattanooga State Community College, with Tennessee American Water serving as the event's corporate sponsor. This year's competition welcomed over 380 third- through fifth-grade students from 16 Hamilton County elementary schools.

In the weeks leading up to the event, students prepared by designing and building machines such as rockets and roller coasters, while also studying a wide range of science concepts. During the competition, students launched gummy bears, constructed bridges using popsicle sticks and tape, and demonstrated their knowledge of ecology, biology, map reading, simple machines and more across 24 different events.

The event also highlights the important role of elementary teachers who serve as mentors, spending time beyond the classroom to prepare students for the extracurricular science challenges.

"We recognize the vital role of early math and science education in today's evolving world," said Dr. Megan Bragg, assistant professor of chemistry at Chattanooga State. "This event aims to inspire young minds to become tomorrow's innovators and problem-solvers, and our partnership with Hamilton County Schools and Tennessee American Water makes that possible."

The event is hosted at the Chattanooga State Omniplex, and over two dozen volunteers from the College and Tennessee American Water oversee and judge the science events.

"The Elementary Science Olympiad gives students the chance to dig deeper into science through hands-on experiments," said Grant Evitts, president of Tennessee American Water. "We appreciate the opportunity to partner with Chattanooga State and support these students and their teachers as they grow into Hamilton County's next generation of innovators."
