

West Virginia American Water Invests Over \$124 Million in Statewide System Upgrades in 2025

CHARLESTON, W.Va., May 14, 2026 /PRNewswire/ -- Ahead of Infrastructure Week, West Virginia American Water announced its 2025 investments for system improvements, totaling more than \$124 million in water and wastewater system upgrades throughout its service area.

"West Virginia American Water is committed to providing clean, safe, reliable and affordable water and wastewater service to our customers, which includes continuously investing in infrastructure and capital upgrades to replace aging water mains," said **Scott Wyman, President of West Virginia American Water**. "These investments help improve service reliability and reduce service disruptions for our more than 600,000 customers across the state. By investing in our communities today, we are helping to build a more resilient tomorrow."

Over the past decade, West Virginia American Water has invested over \$920 million in infrastructure projects and capital upgrades to address aging infrastructure across the Mountain State, including more than 247 miles of new water main.

Wyman added that for every \$1 million invested in water infrastructure, upwards of 10 jobs are created throughout local economies.

West Virginia American Water's ongoing investments encompass upgrades and improvements made to the company's water and wastewater infrastructure, including treatment plants, tanks, pump stations, pipes, and metering equipment.

System improvement highlights for 2025 include:

- **Water and Wastewater Mains:** \$37 million investment to install or replace over 22 miles of water main across the state and install new wastewater main in Jefferson County.
- **Wastewater Treatment Plant and System Improvements:** \$2.5 million in investments in wastewater treatment facilities, including lift station replacements in Boone Raleigh; installation of system and plant controls for the Boone Raleigh Wastewater Treatment Plant and Collection System; and replacing membranes at the East Jefferson Wastewater Treatment Plant.
- **Water Treatment and Production System Improvements:** \$19 million investment for water treatment plant improvements throughout the state, including the rehabilitation of four clarifiers in the Kanawha Valley Water Treatment Plant; rehabilitating wells, pumps, treatment tanks, piping, and system controls in all service territories; and replacing the settling basins and equipment in Huntington.
- **Tanks/Storage:** \$4.2 million investment to improve distribution across our service areas, including constructing two new water storage tanks in Bluefield, and Kanawha County; and recoating two water storage tanks in Kanawha County and Bluestone.

West Virginia American Water consistently invests in the local communities it serves, helping ensure the replacement of aging water infrastructure to enhance service for residents. These ongoing capital investments are vital for maintaining service reliability and exceptional water quality.
