

Blue Cross Blue Shield of Massachusetts Announces 2013 Financial Results Reports modest 1.1% net margin

BOSTON—February 28, 2014 - [Blue Cross Blue Shield of Massachusetts](#) (BCBSMA), Inc. and Blue Cross Blue Shield of Massachusetts HMO Blue, Inc. announced a combined after-tax net income of \$69.1 million and an operating loss of \$17.2 million for its calendar year 2013 financial results. BCBSMA, the leading private health plan in Massachusetts with 2.8 million members as of December 31, 2013, paid more than \$180 million in federal, state and municipal taxes and assessments in 2013, up from \$133 million in 2012.

"Our 2013 operating performance reflects our disciplined effort to keep premiums as low as possible," said Allen Maltz, Chief Financial Officer at BCBSMA. "It also reflects our continued investment in new capabilities such as technology enhancements that will help us deliver even greater value to our customers and members while meeting the obligations of federal and state health reform."

Maltz added that the company is committed to working collaboratively with physicians and hospitals to address the cost of medical care, the largest driver of premium increases. "As good stewards of our members' premiums, we're working hard to ensure that the 90% of the premium dollar used to pay for medical care is being used in the most cost-effective manner." He said the company is also tightly managing the 10% of premiums used for administrative purposes noting that BCBSMA's total administrative spending was lower in 2013 than it was five years ago.

BCBSMA's affordability efforts will continue throughout 2014 as the not-for-profit health plan continues to tightly manage costs while ensuring that members receive the most for their health care premiums. Those efforts include:

- Rewarding physicians and hospitals for improving the cost and quality of care they offer to BCBSMA members. The [Alternative Quality Contract](#) (AQC) is improving the quality of care members receive while at the same time slowing the growth in medical spending. BCBSMA now has 85% of its in-state HMO primary care physicians and 86% of specialists participating in the AQC, caring for approximately 85% of the health plan's in-state HMO members.
- Redesigning our benefits and product offerings to help our members make informed choices about their care. BCBSMA is a leader in [innovative value-based products](#) that reward employers and employees when they choose to receive care from physicians and hospitals that deliver high-quality care at a lower cost.
- Focusing on the way [we support member health](#) for both those with chronic illness and others who are trying to stay healthy.
