

BLUE CROSS BLUE SHIELD OF MASSACHUSETTS AND MASSCHALLENGE ANNOUNCE 2025 HEALTH EQUITY BUSINESS ACCELERATOR PARTICIPANTS

Five equity-focused health care startups each receive \$50,000 grant through tailored program

BOSTON, March 4, 2025 /PRNewswire/ -- As part of our commitment to addressing health inequities, [Blue Cross Blue Shield of Massachusetts](#) ("Blue Cross") and [MassChallenge](#) today announced the five participants of the [2025 Health Equity Business Accelerator](#) ("Accelerator") program.

The Accelerator provides financial, strategic, and mentorship support to equity-focused health care startups. Each of the five members of this cohort will receive a one-time grant of \$50,000 and participate in three months of tailored programming with relevant Blue Cross leaders and experts in conjunction with MassChallenge.

This year, the participating companies bring an array of innovative solutions, including:

- [Docs for Health](#): HIPAA-secure platform enabling health care clinicians and professionals to efficiently close the gap between health care and social care.
- [Rosette Health](#): Revolutionizing health care by eliminating language barriers through AI-driven, culturally competent translation.
- [Trans Health HQ](#): Centralizes trans health resources for clinicians and trans community members in a resource hub.
- [Culture Care Collective](#): Care navigator and health support platform that connects people with unmet social needs to community health workers, social supports, and health services.
- [Tinted Health](#): Digital health platform dedicated to bridging gaps in access, education, and trust within the health care system, which disproportionately impact marginalized communities.

"The 2025 Accelerator participants are working hard to advance health care and better serve consumers," said Ruby Kam, Blue Cross' chief financial officer. "We're excited to support these startups and help them take their solutions to the next level so we can continue to work collectively to improve health equity."

"We believe that startups are vital to transforming health care inclusively, but they need the right partners to drive real change at scale," said Cait Brumme, MassChallenge CEO. "By connecting these extraordinary founders with Blue Cross' expertise and our proven acceleration model, our goal is not only to support individual companies – but also to build pathways with industry leaders like Blue Cross to scale solutions that can create a more equitable health care system."

Startups from previous Accelerator programs have been inducted into the MassChallenge [alumni network](#), which will be offered to this cohort when they complete the program in June. This is an active community of innovators, visionaries, and supporters committed to driving impact across industries. Lifelong membership offers opportunities to connect, collaborate, and give back. Additionally, alumni will have access to exclusive deals such as industry-based discounts for tools, data services, coaching, and expertise from vetted, in-kind partners. They will also benefit from investor connections through MassChallenge's Investor Network and have the option to work in the MassChallenge Boston office (subject to availability).
