

Motorola Razr - 2023 – Offers Nostalgia Reimagined, Available on Boost Wireless Network

An elevated icon arrives at Boost Mobile, ready for the future of 5G

Oct. 19, 2023 – Trendsetters and digital minimalists will appreciate the all-new Motorola Razr 2023. A modern take on a classic flippable design, packed with the latest technology that's compatible with the Boost Wireless Network¹, America's Smart Network™.

The reimagined Razr - 2023 is stylish, pocket-friendly and has an external display so notifications are always easy to see. Available in trendy sage green with a vegan leather exterior, the Razr is easy to grip while being effortlessly cool.

New customers can score this incredible smartphone for only \$199.99 with a \$100 credit² when they switch to Boost Mobile at their local store³. Current customers can also upgrade to the Razr for \$199.99 in-person at Boost Mobile stores. New and current customers who want to upgrade without stepping foot in a store can head to [BoostMobile.com](https://www.boostmobile.com) to purchase the new Razr for \$199.99.

"I remember the original Razr and just how revolutionary that phone was at the time. The all-new Razr is familiar, but when you flip it open, you'll be delighted by how this smartphone has been reimagined," said Michael Kelly, president, Boost Wireless. "I think our customers on the Boost Wireless Network will flip for the new Razr, especially at this price. The design is sleek but it's also packed with amazing features like a versatile camera system that's perfect for selfies."

The Razr puts a twist on an iconic device with an interactive external display that helps digital minimalists have complete control over their notifications. Featuring a new software experience called Moto Unplugged, users can disconnect while allowing the notifications that are most important to them.

Flex View empowers users to capture and create at multiple angles, snapping photos in any light with a 64MP external camera and OIS—or a 32MP internal camera with Quad Pixel technology.

The flip design also offers hands-free convenience when video chatting or looking at a recipe while making dinner.

An ultra-smooth, incredibly vivid display is revealed when the phone is open. Adding to the experience, 6.9" pOLED screen is combined with multidimensional sound. Plus, the patented teardrop hinge has been redesigned to make the flipped-open display virtually creaseless.

Although this flippable smartphone invokes nostalgia, it's made to take advantage of the present with a long-lasting battery⁴ that can be wirelessly charged⁵. All these features are wrapped in a beautiful exterior, perfectly pocket-sized when flipped shut and ready for anyone who wants to stand out in a crowd.

"Some customers will be returning to the Razr, but a new generation will be discovering it for the first time, it's perfect for everyone from moms to students," said Kelly.

For more details on the Motorola Razr, and our entire lineup of Motorola devices, please visit [BoostMobile.com](https://www.boostmobile.com).

¹ Boost Wireless Network available in select markets.

² The \$100 is applied as a \$25 bill credit in months three through six.

³ Offer valid 10/19/23 - 1/2/24. Requires new line activation on select eligible monthly plans. Port-in required. Taxes extra. Full payments must be made for your first two months to receive a \$25 account credit in months three, four, five, and six. While supplies last. Max 1/acct.
