Outlook for 2006

The company's third quarter 2006 diluted EPS is expected to be \$0.46. Full-year 2006 diluted EPS is

expected to be \$1.45. Earnings before interest, taxes, depreciation and amortization ("EBITDA") is expected to be \$175 million. These estimates include the following assumptions.

- * The company expects net domestic unit growth of approximately 4% in 2006;
- * RevPAR is expected to increase 5% for third quarter 2006 and 6% for full-year 2006;
- * The effective royalty rate is expected to increase 3 basis points for full-year 2006;
- * All figures assume the existing share count, include stock-based compensation expense and assume an effective tax rate of 36% for full year 2006.

Use of Free Cash Flow

The company has consistently used its free cash flow (cash flow from operations less capital expenditures) generated from its operations to return value to shareholders. This is primarily achieved through share repurchases and dividends.

For the six months ended June 30, 2006, the company paid \$16.9 million of cash dividends to shareholders. The annual dividend rate per common share is \$0.52.

The company has remaining authorization to purchase up to 5.1 million shares under the share repurchase program. Repurchases will continue to be made in the open market and through privately negotiated transactions subject to market and other conditions. No minimum number of shares has been fixed. Since Choice announced its stock repurchase program on June 25, 1998, the company has repurchased 33.6 million shares of its common stock for a total cost of \$711.9 million through July 25, 2006. Considering the effect of a two-for-one stock split in October 2005, the company has repurchased 66.6 million shares at an average price of \$10.69 per share.

The company expects to continue to return value to its shareholders through a combination of share repurchases and dividends, subject to market and other conditions.
