Forward-Looking Statements

This release contains forward-looking statements, within the meaning of the federal securities laws, including statements related to the offering, a proposed new senior secured credit facility and the anticipated uses of proceeds of the offering. Factors which could impact future results include the uncertainties associated with governmental regulations, general economic and other market conditions, competition, accounting estimates, the variability of our cash flows and the risk factors set forth in our SEC filings, including our Annual Report on Form 10-K for the year ended December 31, 2009, our quarterly reports on Form 10-Q for the first quarter ended March 31, 2010 and the second quarter ended June 30, 2010 and subsequent quarterly reports filed on Form 10-Q. The forward-looking statements should be considered in light of these risks and uncertainties.

These risks and uncertainties include those relating to: the concentration of profits generated from commercial payor plans; continued downward pressure on average realized payment rates from commercial payors, which may result in the loss of revenue or patients; a reduction in the number of patients under higher-paying commercial plans; a reduction in government payment rates or changes to the structure of payments under the Medicare End Stage Renal Disease program or other government-based programs, including, for example, the implementation of a bundled payment rate system beginning January 2011 which will lower reimbursement for services we provide to Medicare patients, and the impact of health care reform legislation that was enacted in the United States in March 2010; changes in pharmaceutical or anemia management practice patterns, payment policies, or pharmaceutical pricing; our ability to maintain contracts with physician medical directors; legal compliance risks, including our continued compliance with complex government regulations; the resolution of ongoing investigations by various federal and state governmental agencies; continued increased competition from large and medium-sized dialysis providers that compete directly with us; and our ability to complete, integrate and successfully operate any businesses we may acquire.

We base our forward-looking statements on information currently available to us at the time of this release, and we undertake no obligation to update or revise any forward-looking statements, whether as a result of changes in underlying factors, new information, future events or otherwise.
