

Court of Appeals Upholds DISH Hopper Ruling — Again

ENGLEWOOD, Colo.--([BUSINESS WIRE](#))--Today, the United States Court of Appeals for the Ninth Circuit unanimously denied Fox Broadcasting Company's petitions to rehear the court's July 2013 rejection of Fox's efforts to bar DISH subscribers from use of the PrimeTime Anytime™ and AutoHop™ features found on the pay-TV provider's Hopper® Whole-Home HD DVR.

The PrimeTime Anytime feature provides consumers with the ability to easily record primetime shows on up to each of the four broadcast networks (ABC, CBS, NBC and Fox) and save them for up to eight days. The AutoHop feature provides consumers the ability to play back certain PrimeTime Anytime recordings commercial-free, starting the day after broadcast.

The following statement can be attributed to DISH Executive Vice President and General Counsel, R. Stanton Dodge:

"With this decision, the Court continues to reject Fox's efforts to deny our customers' access to PrimeTime Anytime and AutoHop -- key features of the Hopper Whole-Home HD DVR.

"This is a victory for American consumers, and we are proud to have stood by their side in this important fight over the fundamental rights of consumer choice and control."

About DISH
