

DISH Selects NEXSYS-ONE's 5G Network Deployment Platform

DISH leverages NEXSYS-ONE's management solutions to support the buildout of the nation's first cloud-native, OpenRAN-based 5G network

LITTLETON, Colo., Oct. 14, 2021 /PRNewswire/ -- DISH Network Corporation (NASDAQ: DISH) selected NEXSYS-ONE for end-to-end, cloud-based network deployment software solutions to manage DISH's nationwide 5G network build.

NEXSYS-ONE's unique platform supports DISH's network deployment with speed and agility, allowing for seamless integration of project, inventory and financial management. The cloud-based platform automates forecasting and tracking, while intuitively updating to increase efficiencies across the DISH deployment teams and their supply chains. With NEXSYS-ONE's platform, DISH has full access and control to easily coordinate network deployment through modules that support project management, procurement, asset management, vendor compliance, colocation, workforce management, documentation, quality control and more.

"We selected NEXSYS-ONE to support our network buildout because it's the only platform available that ties project management, financial controls and inventory planning into one seamless, integrated solution," said Dave Mayo, EVP of Network Deployment, DISH Wireless. "This management tool allows our teams to maintain the organization, control and coordination needed to efficiently deploy our nationwide 5G network at a record-breaking pace."

"We are proud to partner with DISH and to be part of their 5G journey," said Dave Gater, vice president, NEXSYS-ONE. "It's exciting to be able to offer solutions that help facilitate the buildout of the United States' most innovative, greenfield 5G network."
