

GAIN Capital to be Added to the Russell 2000 Index

BEDMINSTER, N.J., March 25, 2011 - GAIN Capital (NYSE: [GCAP](#)), a global provider of online trading services, today announced that its common shares trading under the ticker "GCAP" are set for addition to the Russell 2000® Index on March 31, 2011.

"We are pleased to be added to the Russell 2000 Index following our successful IPO in December 2010," said Glenn Stevens, chief executive officer of GAIN Capital. "We believe our inclusion in the Index will help increase GAIN's visibility in the investment community and provide us with the opportunity to expand our shareholder base."

Russell Investments will reconstitute its U.S. and global equity indexes to include recent Initial Public Offerings (IPOs) at market close on Thursday, March 31, 2011. A preliminary list of additions and deletions was provided by Russell Investments on March 15, 2011.

The Russell 2000 Index measures the performance of the small-cap segment of the U.S. equity universe. The Russell 2000 Index is a subset of the Russell 3000® Index representing approximately eight percent of the total market capitalization of that index. Membership in the Russell 2000 Index, which will remain in place for one year, means automatic inclusion in the appropriate Russell Investments growth and value style indexes.

Russell Investments determines membership for its equity indexes primarily by objective market capitalization rankings and investment style attributes. The Russell 2000 Index is constructed to provide a comprehensive and unbiased small-cap barometer and is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small-cap opportunity set.

IPOs are added to the Russell Indexes on a quarterly basis. Adding IPOs, in addition to the annual Russell Reconstitution of indexes, leads to an enhanced market representation without significant turnover.

Russell Investment indexes are widely used by investment managers and institutional investors for index funds and as benchmarks for both passive and active investment strategies. An industry leading \$3.9 trillion in assets are currently benchmarked to Russell Investment indexes.
