

Emergent Capital, Inc. Announces Third Quarter 2015 Results

Company Reports Book Value of \$8.40 per Share

BOCA RATON, Fla., Nov. 9, 2015 /PRNewswire/ -- Emergent Capital, Inc. (NYSE: EMG) ("Emergent" or the "Company"), today announced its financial results for the three month and nine month periods ended September 30, 2015.

Three Months Ended September 30, 2015

Total income from continuing operations was \$2.8 million for the three month period ended September 30, 2015 compared to a loss from continuing operations of \$3.6 million for the same period in 2014. This increase was primarily a result of a \$2.4 million realized gain on maturities less an adverse impact from updated life expectancies received during the quarter as compared to the same period in 2014.

The following table provides a summary of the components of income from the Company's life settlements.

	Three Months Ended September 30, 2015	Three Months Ended September 30, 2014
Change in estimated probabilistic cash flows	\$ 19,870,666	\$ 17,998,036

Realized gain on maturities	2,420,658	-
Change in fair value of life settlements	\$ 2,667,430	\$ (3,643,216)

Total expenses from continuing operations were \$21.0 million for the three month period ended September 30, 2015 compared to \$2.9 million for the same period in 2014. The increase was primarily related to the expenses totaling \$8.8 million associated with the extinguishment of the senior secured notes as well as additional interest expense of \$4.3 million and a reduction in the fair value of the White Eagle Revolving Credit Facility of \$4.2 million compared to the same period in 2014.

The Company reported net loss from continuing operations of \$13.5 million, or \$(0.48) per fully diluted share, for the three month period ended September 30, 2015, compared to a net loss of \$4.3 million, or \$(0.20) per fully diluted share, for the same period in 2014. The net loss for the three month period ended September 30, 2015 includes an income tax benefit of approximately \$4.7 million compared to \$2.2 million for the same period in 2014.

Nine Months Ended September 30, 2015

Total income from continuing operations was \$43.8 million for the nine month period ended September 30, 2015 compared to \$19.0 million for the same period in 2014. The increase was primarily due to maturities totaling \$53.5 million on 14 life settlement policies. The net gain on fair value from these maturities totaled \$40.2 million for the first nine months of 2015.

The following table provides a summary of the components of income from the Company's life settlements.

Realized gain on maturities	40,240,406	10,568,321
Change in fair value of life settlements	\$ 43,581,734	\$ 19,312,766

Total expenses were \$67.5 million for the nine month period ended September 30, 2015 compared to \$35.3 million for the same period in 2014. The increase was primarily due to an \$18.0 million increase in the change in fair value (liability) of the Company's revolving credit facilities due to higher than expected maturities, extinguishment of the senior secured notes totaling \$8.8 million and higher interest expense of \$10.3 million.

The Company reported a net loss from continuing operations of \$16.7 million, or \$(0.70) per fully diluted share, for the nine month period ended September 30, 2015, compared to a net loss of \$13.9 million, or \$(0.65) per fully diluted share, for the same period in 2014.
