

Legrand Adds Spotify Streaming to On-Q Digital Audio System

Change Also Offers Spotify to Intuity Automation System

MIDDLETOWN, Pa., January 26, 2017 - Legrand, the global specialist in electrical and digital building infrastructure, has announced the integration of Spotify, the world's leading music streaming service, into its On-Q Digital Audio System, a multi-zone, multi-source whole home music solution. The popular Spotify service is now available on new systems, and existing customers will also gain the new features via an automatic software update.

The On-Q DAS is sold as a standalone system and as an integral part of Legrand's Intuity home automation system.

"The On-Q Digital Audio System offers seamless streaming of music from any device - including smartphones, tablets and other portable Bluetooth sources," said Fritz Werder, Legrand VP/general manager, On-Q and Nuvo lines. "Now with Spotify, the entertainment options have grown to offer virtually endless content to suit anyone's tastes. This is also a great add-on for Intuity and will increase the system's overall value."

Spotify offers music fans their favorite songs and access to millions more that can be played and explored randomly or as part of readymade playlists to match their moods. New releases are regularly added and a Top 50 chart tells users which are the hottest at the moment.

Legrand's On-Q Digital Audio System delivers exceptional listening experiences with built-in digital source variety, convenient in-wall amplified keypads, aesthetic app control, and high-quality sound through an easy-to-install structured wiring design. It is simple, scalable, repeatable and can distribute feature-rich audio in up to sixteen zones throughout a home or other facility.
