#### **About Non-GAAP Financial Measures**

The Company believes that EBITDA (earnings before interest, taxes, depreciation and amortization) is useful to investors because it is commonly used to evaluate companies on the basis of operating performance and leverage. Adjusted EBITDA provides an adjusted view of EBITDA that takes into account certain significant non-recurring transactions, if any, such as impairment losses and expenses associated with pending acquisitions, which vary significantly between periods and are not recurring in nature, as well as certain recurring non-cash charges such as changes in fair value of the Company's derivative liabilities and stock-based compensation. The Company believes that Adjusted EBITDA provides investors with a measure of the Company's operational and financial progress that corresponds with the measurements used by management as a basis for allocating resources and making other operating decisions.

EBITDA and Adjusted EBITDA are not intended to represent cash flows for the periods presented, nor have they been presented as an alternative to operating income or as an indicator of operating performance and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"). In accordance with SEC Regulation G, the non-GAAP measurements in this press

release have been reconciled to the nearest GAAP measurement, which can be viewed under the heading "Reconciliation of Net Income (loss) from Operations to EBITDA and Adjusted EBITDA" in the financial tables included in this press release.
