

ZeeVee Introduces Full-Featured ZyPer4K AVoIP Encoder and Decoder Wall Plates at ISE 2023

LITTLETON, Mass., January 18, 2023 – ZeeVee introduces full-featured ZyPer4K encoder and decoder wall plates that enable quick connections of sources and video monitors in AVoIP-driven systems on walls, podiums, conference tables and other fixed position locations.

Both models feature 10/100/1000Base-T Ethernet ports for general purpose device attachment to a network, as well as audio input and output jacks to drive line-level stereo audio. They can distribute content via HDMI 2.0b and USB-C, as well as USB 2.0, which can be configured and routed via the ZeeVee ZyPer Management Platform (ZMP). A video select button on the encoder wall plate enables users to choose either HDMI or USB-C video inputs when both are

connected.

“In many environments, such as classrooms, conference rooms and event spaces, it is desirable to keep the critical AV system gear required—including signal distribution encoders and decoders—out of the way and out of sight,” said Joe Chordas, VP North American Sales and Corporate Marketing, ZeeVee. “Our ZyPer4K wall plates accomplish this without limiting the flexibility and performance for today’s growing list of applications requiring superior AVoIP signal distribution solutions.”

The encoder and decoder wall plates feature IR-IN, IR-OUT and RS232 control ports that enable two-way infrared command information and side-band serial traffic to be distributed as configured by the ZMP.

The back of both the encoder and decoder wall plates provide a power port for connecting 24V DC power via a Phoenix connector, as well as a 10Gb copper (PoE) port for Ethernet connections over Cat6a (or better) cabling.

For more information on the new ZyPer4K encoder and decoder wall plates, please visit www.zeevee.com.

About ZeeVee

ZeeVee (www.zeevee.com) is a leading provider of AV distribution technology. The company has transformed the digital video industry with its award-winning encoders, decoders and software solutions for the pro AV and IT marketplace. Integrators and consultants rely on its innovative, cost-effective and easy to install AVoIP and RF distribution platforms for their corporate, higher education, government, healthcare, casino, museum, hospitality and retail clients. A founding member of the SDVoE Alliance, ZeeVee is the most experienced, deployed and advanced manufacturer of SDVoE products. The company holds a GSA schedule and its products are TAA-compliant. ZeeVee is headquartered near Boston with European HQ in Augsburg, Germany and SE Asian offices in Singapore.
