

ZeeVee Showcases Award-winning SDVoE AVoIP Signal Distribution Products and Intuitive ZyPer Management Platform at InfoComm Southeast Asia 2022

Company to Conduct Several Training Sessions at Conference

LITTLETON, Mass. and SINGAPORE, October 19, 2022 – ZeeVee arrives at InfoComm Southeast Asia 2022 in Bangkok from November 2 – 4, in booth Z11, with the latest models of its award-winning ZyPer family of SDVoE and AVoIP encoders and decoders, intuitive ZyPer Management Platform and innovative control and connectivity accessories.

ZeeVee will feature its ZyPer4K-XS encoders and decoders, which offer the industry's best SDVoE price performance, with lightweight and durable chases and silent fanless thermal management that enable them to be placed virtually anywhere for applications in corporate, higher education, performing arts and government settings. In addition, these models operate on 75% less power than competitive products and are available for delivery in just a few weeks.

"AVoIP is making great inroads in the region's pro AV and IT markets, as evidenced by the many positive conversations we're having with customers about this signal distribution solution," said Ricky Tan, regional sales manager, SE Asia, ZeeVee. "Our ability to deliver product immediately to meet the pent-up demand caused by the pandemic enables integrators to complete projects on schedule and take advantage of the many opportunities before them."

"The increasing demand amongst integrators covering various vertical markets—particularly in Singapore, Thailand and Vietnam—speaks to the success of our education and training courses that clearly outline the many advantages of AVoIP," said Bob Michaels, CEO, ZeeVee. "We are confident that our ZyPer family of cost-effective and power-saving encoders and decoders will be the 'go-to' choice of this increasingly savvy audience over the coming years."

ZeeVee to Conduct Three Training Sessions at the Show

During the show, Art Weeks, ZeeVee's director of product management, will present three comprehensive training sessions for conference attendees:

- **Advanced Imaging Topics in AVoIP** (AVIXA Seminar)

Thursday, November 3, 2022

10:30 - 11:30 am

Seminar Room Amber 4

- **AV Control Integration and the API** (AVIXA Seminar)

Thursday, November 3, 2022

1:30 – 2:30 pm

Seminar Room Amber 4

- **AV Network Preparation, Readiness and Design** (AV Managers' Day Session)

Thursday, November 3, 2022

3:30 - 5:00 pm

Seminar Room Amber 2

ZyPer Management Platform and Control and Connectivity Accessories

The latest version of ZeeVee's ZyPer Management Platform brings advanced multiview, preset and grid features, along with many other industry leading control features, which offer enhanced functionality and user experience. It is designed to control the company's ZyPer4K (SDVoE, uncompressed 4K, 10 Gbps) and ZyPerUHD (JPEG2000, compressed, 1 Gbps) AVoIP encoders and decoders via an intuitive onscreen interface. With it, users can create multiviews from up to 19 sources and video walls (up to 15 x 15) via a simple drag and drop process.

On display for the first time at InfoComm Southeast Asia is the wall-mounted ZyPerPad IP-enabled keypad controller which provides a simple means of sending commands to the ZyPer Management Platform. The unit's browser-based graphical user

interface allows installers to easily configure the unit; it supports DHCP and static IP addresses and also enables individual button configuration via a simple to use web user interface.

ZVConnect, which offers a robust turnkey plug-in conference room video extension solution from laptops to monitors, will also be featured at the booth.

More information about all of ZeeVee's InfoComm Southeast Asia 2022 offerings is available online at www.zeevee.com or contact sales@zeevee.com. Attendees can set up a booth meeting with ZeeVee by setting up a profile via this link: <https://infocomm-sea.com/en/vbooth-visitor-login/>
