

Kramer's PoE-Powered Dante Speakers and Premium Audio Portfolio Make North American Debut at InfoComm 2025

ORLANDO, June 9, 2025—[Kramer](#), the leading company in audio-visual experiences, will be displaying its new line of premium speakers at InfoComm 2025 (booth #4743), highlighted by Power over Ethernet (PoE)-powered Dante ceiling and wall-mounted models.

The new speakers, making their North American debut, deliver exceptional sound quality, sleek design and simplified installation for professional environments.

Networked Audio, Made Simple

The portfolio's PoE-powered Dante speakers enable seamless integration into networked AV systems.

Reduced installation complexity and wiring requirements make them a perfect fit for modern installations. Each PoE-powered Dante speaker has a corresponding passive model with the same industrial design and sound profile, allowing system integrators to mix and match speakers while maintaining consistent sound quality and a cohesive look across installations.

"Integrators and end-users alike will appreciate our PoE-powered Dante speakers that simplify and enhance the entire AV experience from system installation to day-to-day performance," said Dorit Bitter, EVP Product & Technology at Kramer. "These represent important additions to our comprehensive audio solutions for professionals and their customers, residing within our Panta Rhei ecosystem for formidable and intuitive system control."

Premium Sound, Seamless Integration

Kramer's new speaker line delivers crystal-clear audio, optimized for speech clarity and background music, making them ideal for conferencing, education, retail and hospitality settings. With advanced sound dispersion technology, the speakers provide consistent audio coverage, eliminating "dead spots" and ensuring every note and word is heard with precision.

Designed for System Integrators

Kramer's focus on system integrators is evident in the speakers' sleek industrial design and intuitive software. Features like front-access wiring for ceiling speakers and centralized speaker utility software simplify installation, setup and troubleshooting, saving time while delivering consistent, high-quality results.

Part of a Comprehensive Audio Solution

The new speakers are part of Kramer's broader audio portfolio, which also includes DSPs and amplifiers, offering professionals a complete and integrated solution for diverse audio needs. The speaker product range features wall-mounted, ceiling and pendant models in various form factors, all designed to suit varied environments.

Live Demonstration at InfoComm 2025

Select models from the new premium speaker line will be demonstrated at Kramer's booth. All products in the line will be available in Q4 2025.

About Kramer

Kramer audio-visual experiences power creativity, collaboration, and engagement. From AVSM to advanced cloud-based communication, collaboration and control solutions, Kramer creates audio-visual experiences that are more engaging, more inclusive, and more connected than ever before.

Headquartered in the heart of Startup Nation - Tel Aviv, Israel with locations around the world, Kramer's audio-visual experts are designing the future of engagement technology. Physical and digital boundaries have blurred. But no matter how hybrid our world becomes, our desire for real, human connection will never cease.

Kramer's intuitive, seamless technology breaks down walls, bridges gaps, and makes people feel closer together even when they're far apart.
