

ZeeVee Unveils Two-Channel IP Encoder at ISE 2019

Enables Efficient and Flexible Distribution of HD Content From Two AV Sources Over IP Networks

ZeeVee ZyPerMX2 two-channel IP encoder

AMSTERDAM, February 5, 2019— Continuing to expand the industry’s broadest line of AV over IP components, [ZeeVee](#) is introducing the ZyPerMX2, a two-channel IP encoder for distributing two independent HD sources over IP networks employing 1Gb or faster switches.

The new ZyPerMX2 encodes and distributes HD video content up to 1080p @ 60Hz and supports both multicast and unicast UDP and RTP encoding, making it a cost-effective solution for most corporate and commercial HD video-over-IP applications.

The ZyPerMX2 encoder is on display at the ZeeVee ISE 2019 booth (10-S130, Hall 10) in Amsterdam.

“Based on the award-winning technology in our HDbridge 3000, ZyPerMX2 enables our channel partners to hit the ground running with a proven, reliable solution for delivering HD content over an IP network,” said Steve Metzger, ZeeVee co-founder and VP, Hardware & Operations. “It is ideal for applications in venues where a two channel encoder is going to offer significant efficiency in cost, installation time and rack space.”

Integrators and end users can communicate directly with the encoder using the built-in web server that provides full access to configuration parameters, control and other features. Once connected to the network, the IP settings on the encoder can be configured automatically by a DHCP server or can be entered manually in static mode.

The ZyPerMX2 can also pass through up to four channels of embedded audio in Linear PCM, MPEG-1 Audio Layer 2 and other formats, making it a suitable AV distribution solution for churches, stadiums and other public venues that need an affordable long-distance audio solution.

Built-in POE capability provides the option to eliminate the need for additional remote electrical outlets to complete projects.

The ZyPerMX2-4-MX, capable of supporting four HLS streams, is available now for a MSRP of \$1,905 US. The ZyPerMX2-100-MX, which supports up to 100 HLS streams, is also available for a MSRP of \$2,858 US. The ZyPerMX-4-MX can also be upgraded to a 100-MX via the ZyPerMX2-Key, which carries a MSRP of \$953 US.

About ZeeVee

ZeeVee (www.zeevee.com) is a global manufacturer of video and signal distribution technology for the ProAV and IT marketplace. As the only manufacturer today that can deliver multimedia content over coax, fiber and CATx, ZeeVee has transformed the digital video industry with its award-winning, HD to Ultra-HD/4K solutions. The company offers a variety of innovative, cost-effective and easy to install distribution platforms. ZeeVee is installed in thousands of facilities worldwide where there is a need to transport HD/UHD content from multiple sources to multiple displays over long distances. ZeeVee is a founding member of the SDVoE Alliance and a Global Presence Alliance Technology Partner.
