

Media Alert: Quantum Computing: Take a Tour of the IBM Q Lab via Facebook Live Today

NEW YORK, March 9, 2017 /[PRNewswire](#)/ --

When: Thursday, March 9, 2017
11:00 AM EST

Where: [Live](#) on Facebook from the IBM (NYSE:[IBM](#)) Research Lab in Yorktown Heights, New York

What: Join us [live](#) to learn what quantum computing is and take a tour of the new [IBM Q Lab](#) with IBM scientists Jerry Chow, Manager, Experimental Quantum Computing and Jay Gambetta, Manager, Theory of Quantum Computing and Information who are working on IBM Q, an industry-first initiative to build commercially available universal quantum computers for business and science. Jerry and Jay will provide an inside look at the [IBM Q Lab](#) and an interactive discussion about quantum computing.

The [broadcast](#) will include live demonstrations, a tour of the [IBM Q Lab](#), and an opportunity to ask IBM Research scientists about quantum computing. The discussion will address what quantum computing is, how it works, how it's being developed and quantum's potential to impact industries such as Artificial intelligence, drug and material discovery, supply chain and logistics and financial services.
